

Lead Security Architect

Location: Dublin (hybrid 2 days) or UK Remote

Contract type: Permanent

Position Overview

We are seeking an experienced Lead Security Architect to design and lead the future of our security strategy and architecture. This is a strategic role for a visionary security leader who will drive the design of future-fit, AI-ready security controls and translate emerging agentic-led security concepts into practical, enterprise-grade control designs. You will shape our security posture to anticipate tomorrow's threats while mentoring technical teams and collaborating across the organization to embed security excellence into our DNA.

Key Responsibilities

Future-Focused Security Architecture & Innovation

Build next-generation security architectures that anticipate and address emerging threats in an AI-driven landscape

Lead the strategic vision and implementation of agentic-led security models, translating conceptual frameworks into actionable control designs

Drive the adoption and optimization of AI-ready security controls and automation across the organization

Evaluate and integrate cutting-edge security technologies and frameworks to maintain competitive advantage

Architect solutions demonstrating AWS, cloud-native platforms, and specialized security tools to create resilient, scalable security ecosystems

Contribute to the development and implementation of the organization's long-term security strategy and roadmap, seeing opportunities for innovation and strategic advancement

Technology Leadership & Expertise

Provide deep technical expertise and strategic guidance in the deployment and optimization of key security platforms:

AWS security architecture and infrastructure protection

Wiz cloud security and workload protection

Splunk security analytics, SIEM, and threat detection

Google Threat Intelligence integration and threat contextualization

CrowdStrike endpoint detection and response (EDR)

Cato AIM for AI security posture management

Lead technical security architecture reviews and approvals across all systems and applications

Drive threat modeling, risk assessments, and vulnerability management using advanced tools and AI-powered insights

Stay at the forefront of security trends, emerging technologies, and industry guidelines, engaging with the broader security community

Leadership & Strategic Influence

Lead and mentor technical security teams, fostering a culture of innovation, security excellence, and continuous improvement

Act as a thought leader and trusted advisor, influencing security strategy across the organization

Build and maintain strategic relationships with internal partners, technical teams, and third-party vendors to ensure effective security service delivery

Collaborate with product, technology, engineering, and business functions to embed security into organizational DNA and ensure secure design and operation of systems and applications

Champion security-first thinking in migration, modernization, and digital transformation initiatives

Share knowledge within the broader security community and promote security awareness and standard processes across the organization

Enterprise Security Operations & Compliance

Be responsible for the implementation of security policies, standards, and procedures aligned with modern frameworks and standards

Manage incident, change, problem, and risk management processes with a focus on prevention and rapid response

Ensure compliance with relevant security frameworks and regulatory requirements

Support migration and modernization projects with a focus on cybersecurity standards and future-readiness

Participate in the ongoing improvement of security processes and controls, including regular reviews and updates of security policies and procedures

Required Qualifications

Significant number of years experience in cybersecurity architecture and design, with significant hands-on expertise in enterprise security technologies

Proven deep expertise with AWS security architecture, controls, and procedures in enterprise environments

Demonstrated expertise with modern cloud security platforms, endpoint detection and response (EDR), and SIEM solutions

Strong understanding of advanced threat intelligence integration and threat-driven security architecture

Hands-on experience with at least three of the following: Wiz, Splunk, CrowdStrike, Cato AIM, Google Threat Intelligence

Proven track record of designing and implementing AI-ready and automated security controls at scale

Leadership experience managing security teams and driving organizational security initiatives

Excellent collaboration and communication skills with the ability to translate complex concepts for diverse audiences

Practical understanding of cybersecurity principles, emerging trends, and next-generation security frameworks

Experience working in Agile and fast-paced, evolving threat landscapes

Desired Qualifications

Experience conceptualizing and implementing agentic-led security models or autonomous security operations

Expertise in securing AI/ML systems and applications

Relevant advanced security certifications (CISSP, CCSK, or equivalent)

Experience supporting large-scale migration, modernization, and digital transformation projects

Background in software engineering, coding, and security automation

Active engagement with the security community and thought leadership (speaking, publications, etc.)

Experience in regulated industries with complex compliance requirements

What We Offer:

Flexible Working

Competitive bonus scheme

Uncapped holiday allowance

Enhanced pension scheme

Private healthcare

Life assurance

Income protection

£1,000 annual self-development learning fund

Invest via the Flutter Sharesave Scheme

Enhanced parental leave

Professional Growth

Opportunity to shape the future of security in a fast-moving, innovative organization

Access to cutting-edge security technologies and platforms

Budget and support for professional development and advanced certifications

Network with industry leaders and security innovators

About Flutter

We are a world leader in online sports betting and iGaming, with market-leading positions in the US and globally. Our unparalleled portfolio includes innovative brands such as FanDuel, Sky Betting & Gaming, Sportsbet, PokerStars, Paddy Power, Sisal, tombola, Betfair, MaxBet, Jungle Games, and Adjarabet.

With our global scale and challenger mentality, we excite and entertain our customers in a safe and sustainable way. Through our collective power—the Flutter Edge—we aim to change the sector, learning from the past to create a better future for our customers, colleagues, and communities.

Commitment to Inclusion

We're working to be an inclusive employer and encourage people from all backgrounds, ways of thinking, and working styles to apply. Everyone brings different perspectives and experiences; you don't have to meet all the requirements listed to apply for this role.

If you need any adjustments to make this role work for you, please let us know, and we'll see how we can accommodate them.
